ABOUT ME

Full Stack Developer at Cultrd Growers LLP, building the internal ERPs a jewelry business runs on: production tracking, stock, vendor work, invoicing and double-entry ledgers. I work across the stack, from PostgreSQL schemas and tRPC APIs to React interfaces, and on my own time I build desktop and mobile apps with Electron and Expo. Studying for a B.Sc. IT alongside full-time work.

Recognition

- **Certified Full Stack Developer:** Completed MERN training at Red & White Skill Education, building 10+ end-to-end web projects.
- **TechWar 2024 Hackathon:** Built a working prototype with a team inside a 24-hour deadline.
- **PhonePe UI Clone Challenge:** Recreated the PhonePe mobile UI in React and Tailwind CSS.

Skills

- **Frontend:** React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, TanStack Table and Query, Vite.
- **Backend & DB:** Node.js, Express.js, tRPC, Fastify, REST APIs, Prisma, Drizzle, PostgreSQL, MongoDB, Firebase.
- **Desktop & Mobile:** Electron, Expo, React Native.
- **Testing & Tools:** Playwright, Vitest, Git/GitHub, GitHub Actions, Postman, Vercel.
- **Security & Services:** JWT, bcrypt, Razorpay, Cloudinary, Gemini AI API.
- **Fundamentals:** Data Structures & Algorithms (DSA), OOP, Problem Solving.

EXPERIENCE

Full Stack Developer | *Cultrd Growers LLP*

Jun 2026 – Present | Surat (Hybrid) | Next.js, TypeScript, tRPC, Prisma, PostgreSQL

- Build and maintain two internal web ERPs in a shared TypeScript monorepo, with 550+ commits since joining.
- Production ERP: built the CAD queue with a 3D model viewer, combined casting and setting jobs with vendors, a repairs flow and an order timeline.
- Accounting ERP: built diamond issuing to vendors with bag numbering and certificate stickers, goods receipt from vendor packing-list PDFs, ledger-driven accounts, and invoices auto-priced from a rate card.
- Wrote shared packages used by both ERPs, including a data-table engine with Excel-style filters and a packing-list PDF parser.

PROJECTS

Diamond Inventory Desktop App | *Electron, React, Redux Toolkit, Express, MongoDB, Playwright*

- Built solo: a Windows app that tracks diamonds from rough parcels through production to polished stock, with sales and accounting alongside.
- Offline mode for inventory, production and sales that syncs when the network returns; multi-company books; signed installer with machine activation and auto-updates; 38 Playwright test files.

Strenoxa E-Commerce Platform | *Next.js 14, TypeScript, Redux Toolkit, Razorpay, MongoDB*

- Built on the Next.js 14 App Router with TypeScript and deployed on Vercel, with under 1.5s page load and a 95+ Lighthouse score.
- Integrated Razorpay with signature verification for Card, UPI, Netbanking and COD; added coupon validation, tax calculation and an address book.

Paper Trading Platform | *TypeScript, Fastify, Drizzle ORM, PostgreSQL, Expo*

- Multi-user paper trading for NSE/BSE, US stocks and crypto with real prices and simulated fills, plus an Expo Android app.
- Matching worker keeps open orders in memory and only queries the database when an order changes, so the hosted Postgres can sleep when idle.

Full-Stack Inventory System | *React, Node.js, Express, MongoDB*

- MERN dashboard with 8 views, 4 MongoDB models and 5 REST routes for products and orders, JWT-protected routes and Cloudinary image storage.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)
Vidhyadeep University
2024 – 2027 (Expected)

Higher Secondary Education (12th)
Shri C.C. Shah English High School
2023 – 2024

Secondary Education (10th)
Shri C.C. Shah English High School
2021 – 2022
